

Steps to setup Windows Insider preview build and enable the new functionality on a test machine:

1. Join Windows Insider (Beta Channel)

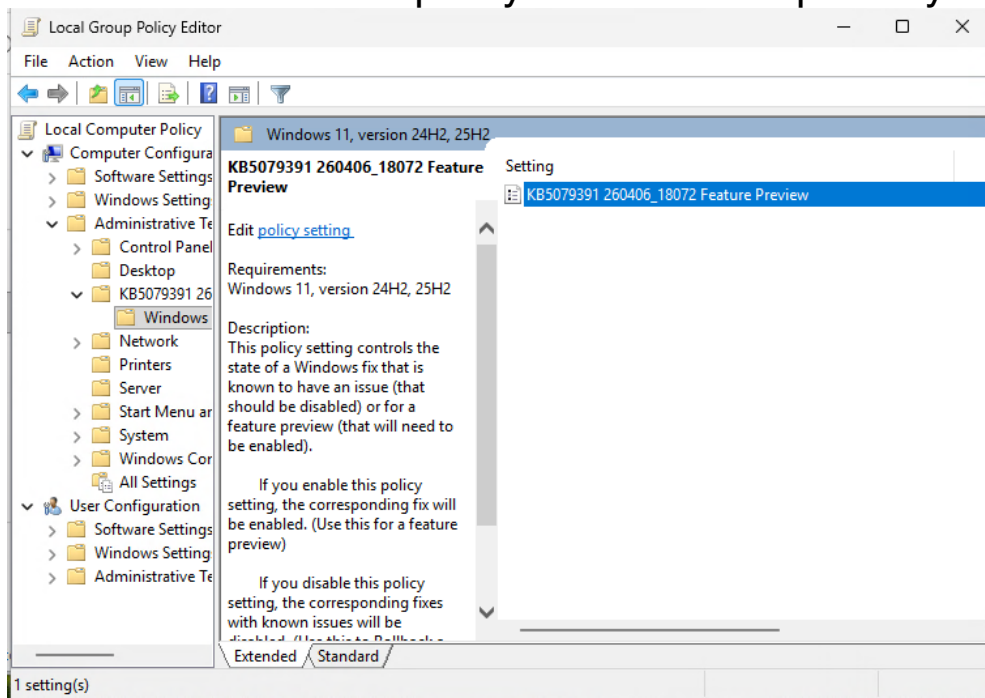

- Go to *Settings* → *Windows Update* → *Windows Insider Program*
- Select the **Beta Channel**

2. Install latest updates

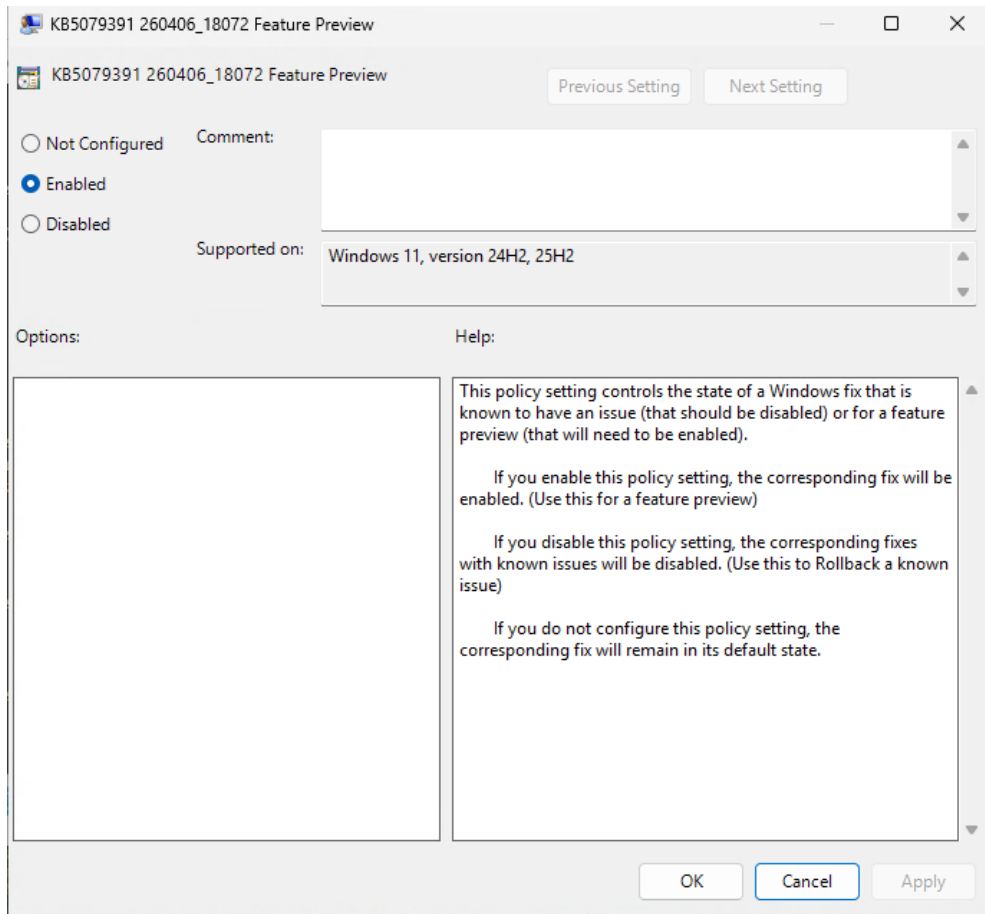

- Check for updates and install the latest Insider Preview build
- Build number should be 26220.8474 or above.

3. Enable the feature

- Install the provided Feature Preview MSI package:
